**NEW QUESTION: 1**

A customer has an Aruba Mobile First Network. Which need indicates that the customer could be a good prospect for an additional Aruba security solution?

- A. the need to secure guest and BYOD access
- B. the need to encrypt big data and archived data
- C. the need to protect servers against malware at the silicon level
- D. the need to track meeting room utilization

**Answer: A**

**NEW QUESTION: 2**

What action should a network administrator take to enable VTP pruning on an entire management domain?

- A. Enable VTP pruning on any switch in the management domain.
- B. Enable VTP pruning on every switch in the domain.
- C. Enable VTP pruning on any client switch in the domain.
- D. Enable VTP pruning on a VTP server in the management domain.

**Answer: D**

Explanation:

Enabling VTP pruning on a VTP server allows pruning for the entire management domain. Enabling this on the VTP server will mean that the VTP pruning configuration will be propagated to all VTP client switches within the domain. VTP pruning takes effect several seconds after you enable it. By default, VLANs 2 through 1000 are pruning-eligible.
