There are a couple of driving forces behind **Updated E_S4HCON2022 Demo** this desirable tide, They do not want to waste too much time and money any more.

NEW QUESTION: 1

Which of the following can limit Amazon Storage Service (Amazon S3) bucket access to specific users?

- A. Amazon Inspector
- B. A public and private key-pair
- C. Security Groups
- D. AWS Identity and Access Management (IAM) policies

Answer: D

NEW QUESTION: 2

You are planning to create a virtual network that has a scale set that contains six virtual machines (VMs).

A monitoring solution on a different network will need access to the VMs inside the scale set.

You need to define public access to the VMs.

Solution: Design a scale set to automatically assign public IP addresses to all VMs.

- A. Yes
- B. No

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-machine-scale-sets/virtual-machine-scale-sets-overview> A scale set is created inside a virtual network, and individual VMs in the scale set are not allocated public IP addresses by default. This policy avoids the expense and management overhead of allocating separate public IP addresses to all the nodes in your compute grid. If you do need direct external connections to scale set VMs, you can configure a scale set to automatically assign public IP addresses to new VMs.

NEW QUESTION: 3

DRAG DROP

Answer:

Explanation:

NEW QUESTION: 4

A. 0

B. 1

C. 2

D. 3

Answer: C
